Table of Contents Volume 171, 1987

Number 1

C. Kerhoas, G. Gay, C. Dumas: A multidisciplinary approach to the study of the plasma membrane of *Zea mays* pollen during controlled dehydration 1
P.A. Scolnik, P. Hinton, I.M. Greenblatt, G. Giuliano, M.R. Delanoy, D.L. Spector, D. Pollock: Somatic instability of carotenoid biosynthesis in the tomato *ghost* mutant and its effect on plastid development 11
K. Schmitz, B. Cuypers, M. Moll: Pathway of assimilate transfer between mesophyll cells and minor veins in leaves of *Cucumis melo* L. 19
J.W. La Claire II: Microtubule cytoskeleton in intact and wounded coenocytic green algae 30
L.A. Staehelin, R.L. Chapman: Secretion and membrane recycling in plant cells: novel intermediary structures visualized in ultrarapidly frozen sycamore and carrot suspension-culture cells 43
C. Imbrie-Milligan, K.K. Kamo, T.K. Hodges: Microcallus growth from maize protoplasts 58
S. Malkin: Fast photoacoustic transients from dark-adapted intact leaves: oxygen evolution and uptake pulses during photosynthetic induction – a phenomenology record 65
R. Turgeon: Phloem unloading in tobacco sink leaves: insensitivity to anoxia indicates a symplastic pathway 73
G. Gay, C. Kerhoas, C. Dumas: Quality of a stress-sensitive *Cucurbita pepo* L. pollen 82
G. Weissenböck, H. Schnabl, H. Scharf, G. Sachs: On the properties of fluorescing compounds in guard and epidermal cells of *Allium cepa* L. 88
R. Schmid, E.-M. Idziak, M. Tünnermann: Action spectrum for the blue-light-dependent morphogenesis of hair whorls in *Acetabularia mediterranea* 96
M. Lay-Yee, R.M. Sachs, M.S. Reid: Changes in cotyledon mRNA during floral induction of *Pharbitis nil* cv. Violet 104
M. Iino: Kinetic modelling of phototropism in maize coleoptiles 110
K.J. Föhr, M. Enssle. H. Schraudolf: Calmodulin-like protein from the fern *Anemia phyllitidis* L. Sw. . . . 127
J. Fink, W. Jeblick, W. Blaschek, H. Kauss: Calcium ions and polyamines activate the plasma membrane-located 1,3-β-glucan synthase 130
C. Schuster, R. Oelmüller, H. Mohr: Signal storage in phytochrome action on nitrate-mediated induction of nitrate and nitrite reductases in mustard seedling cotyledons 136

Number 2

B.R. Terry, A.W. Robards: Hydrodynamic radius alone governs the mobility of molecules through plasmodesmata 145
D.L. Kropf, R.S. Quatrano: Localization of membrane-associated calcium during development of fucoid algae using chlorotetracycline 158
B. Demmig, O. Björkman: Comparison of the effect of excessive light on chlorophyll fluorescence (77 K) and photon yield of O_2 evolution in leaves of higher plants 171
H.-P. Getz, D. Knauer, J. Willenbrink: Transport of sugars across the plasma membrane of beetroot protoplasts 185
M.A. Madore, W.J. Lucas: Control of photoassimilate movement in source-leaf tissues of *Ipomoea tricolor* Cav. 197
S.C. Fry: Intracellular feruloylation of pectic polysaccharides 205
P.C. Odén, E.W. Weiler, L. Schwenen, J.E. Graebe: Comparison of gas chromatography-mass spectrometry, radioimmunoassay and bioassay for the quantification of gibberellin A_9 in Norway spruce (*Picea abies* (L.) Karst.) 212
H. Laasch: Non-photochemical quenching of chlorophyll a fluorescence in isolated chloroplasts under conditions of stressed photosynthesis 220
S. Hunt, A.M. Smith, H.W. Woolhouse: Evidence for a light-dependent system for reassimilation of photorespiratory CO_2, which does not include a C_4 cycle, in the C_3-C_4 intermediate species *Moricandia arvenis* 227
H.-P. Getz, M. Schulte-Altedorneburg, J. Willenbrink: Effects of fusicoccin and abscisic acid on glucose uptake into isolated beetroot protoplasts 235
K. Gausing: Thionin genes specifically expressed in barley leaves 241
G.M. Clint, E.A.C. MacRobbie: Sodium efflux from perfused giant algal cells 247
R.M. Sawyer, D. Boulter, J.A. Gatehouse: Nuclease sensitivity of storage-protein genes in isolated nuclei of pea seeds 254
G. Kreimer, B. Surek, I.E. Woodrow, E. Latzko: Calcium binding by spinach stromal proteins 259
D.J. Cosgrove: Wall relaxation in growing stems: comparison of four species and assessment of measurement techniques 266
W. Knogge, E. Kombrink, E. Schmelzer, K. Hahlbrock: Occurence of phytoalexins and other putative defense-related substances in uninfected parsley plants . . . 279

Number 3

M.E. Dudley, T.W. Jacobs, S.R. Long: Microscopic studies of cell divisions induced in alfalfa roots by *Rhizobium meliloti* 289
C. Grief, P.J. Shaw: Assembly of cell-wall glycoproteins of *Chlamydomonas reinhardii*: Oligosaccharides are added in medial and trans Golgi compartments . . 302
R. Sharma, P. Schopfer: Phytochrome-mediated regulation of β-amylase mRNA level in mustard (*Sinapis alba* L.) cotyledons 313
T.C. Johnson, R.Q. Cao, J.E. Kung, B.B. Buchanan: Thioredoxin and NADP-thioredoxin reductase from cultured carrot cells 321
V. Speth, V. Otto, E. Schäfer: Intracellular localisation of phytochrome and ubiquitin in red-light-irradiated oat coleoptiles by electron microscopy 332
S.J. Britz, W.E. Hungerford, D.R. Lee: Rhythms during extended dark periods determine rates of net photosynthesis and accumulation of starch and soluble sugars in subsequent light periods in leaves of *Sorghum* . . 339
F.-S. Wu: Localization of mitochondria in plant cells by vital staining with rhodamine 123 346

S.J. Neill, R. Horgan, A.F. Rees: Seed development and vivipary in *Zea mays* L. 358
R.J. Cyr, M.M. Bustos, M.J. Guiltinan, D.E. Fosket: Developmental modulation of tubulin protein and mRNA levels during somatic embryogenesis in cultured carrot cells 365
P.J. White, D.T. Clarkson, M.J. Earnshaw: Acclimation of potassium influx in rye (*Secale cereale*) to low root temperatures 377
H. Gerbling, B. Gerhardt: Activation of fatty acids by non-glyoxysomal peroxisomes 386
R. Peerbolte, W. te Lintel Hekkert, D.G. Barfield, J.H.C. Hoge, G.J. Wullems, R.A. Schilperoort: Structure, organization and expression of transferred DNA in *Nicotiana plumbaginifolia* crown-gall tissues 393
F. Lütke-Brinkhaus, H. Kleinig: Formation of isopentenyl diphosphate via mevalonate does not occur within etioplasts and etiochloroplasts of mustard (*Sinapis alba* L.) seedlings 406
A. Ziegler-Jöns, H. Selinger: Calculation of leaf photosynthetic parameters from light-response curves for ecophysiological applications 412
M.A. Catley, C.M. Bowman, M.W. Bayliss, M.D. Gale: The pattern of amyloplast DNA accumulation during wheat endosperm development 416
A. Ernstsen, G. Sandberg, A. Crozier, C.T. Wheeler: Endogenous indoles and the biosynthesis and metabolism of indole-3-acetic acid in cultures of *Rhizobium phaseoli* 422
A.-K.J. Sallal, R.H. Al-Hasan, N.A. Nimer: Localization of glycollate dehydrogenase in *Dunaliella salina* . . 429

Number 4

F. Grolig, G. Wagner: Vital staining permits isolation of calcium vesicles from the green alga *Mougeotia* . . . 433
M.A. Anderson, P.J. Harris, I. Bonig, A.E. Clarke: Immuno-gold localization of α-L-arabinofuranosyl residues in pollen tubes of *Nicotiana alata* Link et Otto 438
A. Nisius, H.G. Ruppel: Immunocytological and chemical studies on the stromacentre-forming protein from *Avena* plastids 443
M.G. Hahn, D.R. Lerner, M.S. Fitter, P.M. Norman, C.J. Lamb: Characterization of monoclonal antibodies to protoplast membranes of *Nicotiana tabacum* identified by an enzyme-linked immunosorbent assay 453
M.U.F. Kirschbaum: Water stress in *Eucalyptus pauciflora*: comparison of effects on stomatal conductance with effects on the mesophyll capacity for photosynthesis, and investigation of a possible involvement of photoinhibition 466
J. Daie: Sucrose uptake in isolated phloem of celery is a single saturable transport system 474
H. Quentmeier, E. Ingold, H.U. Seitz: Purification of an autocatalytic protein-glycosylating enzyme from cell suspensions of *Daucus carota* L. 483
J.C. Hawke, R.M. Leech: Acetyl-CoA-carboxylase activity in normally developing wheat leaves 489
M. Pineda, P. Cabello, J. Cárdenas: Ammonium regulation of urate uptake in *Chlamydomonas reinhardtii* 496
M. Sabater, P.H. Rubery: Auxin carriers in *Cucurbita* vesicles. I. Imposed perturbations of transmembrane pH and electrical potential gradients characterised by radioactive probes 501
M. Sabater, P.H. Rubery: Auxin carriers in *Cucurbita* vesicles. II. Evidence that carrier-mediated routes of both indole-3-acetic acid influx and efflux are electroimpelled 507
M. Sabater, P.H. Rubery: Auxin carriers in *Cucurbita* vesicles. III. Specificity, with particular reference to 1-naphthylacetic acid 514
G. Kochs, R. Welle, H. Grisebach: Differential induction of enzyme in soybean cell cultures by elicitor or osmotic stress 519
S.P.C. Groot, C.M. Karssen: Gibberellins regulate seed germination in tomato by endosperm weakening: a study with gibberellin-deficient mutants 525
P.J. McAuley: Nitrogen limitation and amino-acid metabolism of *Chlorella* symbiotic with green hydra . . . 532
A.N. Binns, J. Labriola, R.C. Black: Initiation of auxin autonomy in *Nicotiana glutinosa* cells by the cytokinin-biosynthesis gene from *Agrobacterium tumefaciens* 539
J. Kobza, G.E. Edwards: The photosynthetic induction response in wheat leaves: net CO_2 uptake, enzyme activation, and leaf metabolites 549
M.S. Rajeevan, A. Lang: Comparison of de-novo flower-bud formation in a photoperiodic and a day-neutral tobacco 560

Short communication

B. Surek, G. Kreimer, M. Melkonian, E. Latzko: Spinach ferredoxin is a calcium-binding protein 565
